Lattices and Categoires of Modules

George Hutchinson

Chapter I: Mathematical Theories Associated with Rings and Modules

1 Introduction

Part01.PDF

2 Modular Lattices that are Representable by Modules

Part01.PDF

3 Additive Relation Algebra

Part02.PDF

4 Frames in Modular Lattices

Part03.PDF

5 Relation Categories and Functors

Part04.PDF

6 Category Logic and Horn Sentence Translation

Part05.PDF

7 Equivalence and Inclusion of Rings for Module Theories

Part05.PDF

Chapter II: Computability and Unsolvability for Module Theories

8 Recursively Unsolvable Word Problems and Decision Problems

Part06.PDF

9 Division of Integers Corresponding to Integers in a Ring

Part06.PDF

10 Free Word Problems for Additive Relation Algebras of Modules

Part07.PDF

11 Extensions of Solvability for Coretracts of Free Algebras

Part08.PDF

12 Appendix D: Theory of Lattice Representation Proofs

Part09.PDF

13 Bibliography of Frequently Used Papers

Part09.PDF
